KYLE JESSIE BLAGG

RADAR OPERATIONS | TEST AND EVALUATION | SYSTEM READINESS

Norfolk, Virginia | blaggkyle@gmail.com | (774) 313-9810

SUMMARY

Radar operations and systems professional with 7+ years supporting mission-critical defense radar systems, including approximately 5.5 years in THAAD fire control and radar operations and 1.5 years operating the Relocatable Over-the-Horizon Radar. Experienced in readiness assessment, diagnostics, fault isolation, maintenance, functional testing, technical training, documentation, and coordination with engineers.

PROFESSIONAL EXPERIENCE

Abacus | *Systems Analyst I* | Virginia Beach, VA **April 2025 - Present**

- **Operational Support:** Diagnose and resolve hardware, software, and application issues for the Treasurer's Office, sustaining reliable daily operations.
- **Requirements and Testing:** Translate business needs into technical plans and conduct functional and reliability testing; reproduce defects, document results, and coordinate resolution.
- **Data Systems:** Maintain T-SQL and SQL Server systems through data validation, query troubleshooting, and performance support.
- **Application Modernization:** Convert legacy Visual FoxPro applications into maintainable C# and .NET solutions while validating workflows and enhancements with users.

Raytheon Technologies | *ROTHR Radar Operator* | Chesapeake, VA **August 2021 - January 2023**

- **Radar Operations:** Operated and monitored the Relocatable Over-the-Horizon Radar in a Windows environment to support continuous wide-area surveillance.
- **Readiness and Diagnostics:** Performed system checks, evaluated operating conditions, and isolated faults to maintain radar availability and mission readiness.
- **System Improvement:** Implemented updates and operational improvements that increased efficiency by 15% while preserving system reliability.
- **Engineering Coordination:** Provided operator feedback to engineers, improved graphical user interface usability, and supported validation of system changes.

United States Army | *THAAD Operator/Maintainer, MOS 14E7A* **November 2015 - July 2021**

- **THAAD Operations:** Operated and maintained fire control and radar systems valued above $800M, supporting continuous air and missile defense readiness.
- **Fault Isolation:** Conducted readiness checks, interpreted system data, and isolated failed components, preventing approximately $50K in potential losses and reducing downtime.
- **Systems Infrastructure:** Maintained Red Hat Linux servers and networking infrastructure supporting integrated-system communications and data transmission.
- **Training and Risk Control:** Trained personnel on operations, troubleshooting, and server procedures and supported movement of assets valued above $20M with zero equipment or personnel damage.

SKILLS

- **Radar and Readiness:** Surveillance radar operations, THAAD fire control and radar, ROTHR, operational readiness, diagnostics, and fault isolation.
- **Testing and Technical Support:** Functional and reliability testing, system maintenance, risk mitigation, requirements analysis, and technical documentation.
- **Platforms and Development:** Windows, Red Hat Linux, C# and .NET, T-SQL, SQL Server, and cross-functional engineering coordination.

EDUCATION

Master of Science in Computer Science In Progress
Old Dominion University | Norfolk, VA

Bachelor of Science in Computer Science **Completed**
Old Dominion University | Norfolk, VA

Associate of Science in Computer Science **Completed**
Tidewater Community College | Virginia Beach, VA

ADDITIONAL INFORMATION

- **Training:** THAAD Missile System Certification; Patriot Fire Control Enhanced Operator/Maintainer training.
- **Clearance:** Previously held U.S. DoD Secret clearance.
